I am Essel Eghan, a second-year Information Technology student at the University of Ghana, Legon, driven by a fervent passion for technology and an unwavering commitment to excellence. My academic journey has been marked by a dedication to practical experience and meaningful contributions to IT projects. Proficient in programming languages such as Java, Python, and C#, as well as web development technologies including HTML, CSS, JavaScript, React, and Tailwind CSS, I have honed my skills through hands-on engagement and continuous learning. My education has provided me with a robust theoretical foundation, complemented by real-world application through internships and projects. From developing console applications at NCR to contributing to the design of responsive web interfaces, I have gained invaluable experience in software development and UI/UX design. Throughout my academic tenure, I have embraced collaboration, recognizing its transformative power in achieving collective goals. Effective communication has been central to my success, enabling me to bridge the gap between stakeholders and drive

project success. Looking ahead, I am driven by a sense of purpose and a commitment to continuous growth. Eager to tackle new challenges and seize opportunities for professional development, I am poised to make meaningful contributions to the ever-evolving landscape of Information Technology. My journey is a testament to my passion, pursuit of excellence, and dedication to leveraging technology for positive change.

Professional Summary

Experience

NCR Ghana

Accra, AA, GH   **AUG 2023 - SEP 2023**

Intern, Intern, Skills Development Program

During my internship at NCR, I participated in a Skills Development Program focused on improving my software development skills. Engaging in structured learning and mentorship, I gained practical experience in developing console applications in C# and building web applications using C# and ASP.NET MVC. Additionally, I acquired insights into ATM systems operation.

- Through the Skills Development Program, I significantly improved my proficiency in C# and ASP.NET MVC, laying a solid foundation for future endeavors. Despite no specific job duties, I gained valuable hands-on experience in software development, applying theoretical knowledge in real-world scenarios. Additionally, understanding ATM systems functionality provided a unique perspective on technology in the financial sector, enriching my overall understanding. Professional networking during the internship has been instrumental in my career development and exploration of future opportunities.

Sojourn Cabins

Accra, AA, GH   **MAY 2023 - AUG 2023**

Skills

fontend development,
Interestspment,

programming, gaming

English

Frontend Developer, Frontend Developer

At Sojourn Cabins, I contributed to the development of a user-friendly online booking platform. Collaborating with the team, I focused on UI/UX design and front-end development, utilizing tools like Figma, GitHub, and React to enhance user experience.

- Through UI/UX design contributions, I improved the usability of the booking platform, ensuring a seamless experience for users. Utilizing tools like Figma and React, I implemented innovative design solutions that enhanced functionality and accessibility.

Projects

Front-End Dashbord For Sojourn Cabins

Frontend Developer

8 MEMBER IN TEAM AND COMPLETE IN 3 MONTHS

- Developed a frontend dashboard for Sojourn Cabins, facilitating streamlined management of bookings and guest information. Utilized React.js and Tailwind CSS to create a user-friendly interface with intuitive navigation and responsive design, enhancing the overall user experience for both administrators and guests.

Doctor Booking Website

Project Manager, Front-End Developer, Busines

9 MEMBER IN TEAM AND COMPLETE IN 4 MONTHS

- Led a multidisciplinary team in developing a doctor booking application using React, Tailwind CSS, Node.js, Express.js, and MongoDB. As project manager, oversaw project execution, coordinated team efforts, and ensured adherence to timelines. Spearheaded frontend development, while also providing backend support. Resulted in a user-friendly platform facilitating seamless appointment scheduling, leveraging collaborative teamwork and technical expertise.

First Person Shooter Game

Game Developer

1 MEMBER IN TEAM AND COMPLETE IN 2 MONTHS

- Individually developed a captivating first-person shooter game in Unity, leveraging built-in assets from the Unity Asset Store. Scripted game mechanics and interactions using C#, optimizing performance and gameplay

experience. Resulted in an immersive gaming experience with dynamic environments, challenging adversaries, and engaging gameplay, showcasing technical proficiency and creativity in game development.
